The bigger picture

© 2005 — 2025 Kiva All rights reserved.

Giving Funds place in the Kiva 2.0 flywheel

We are most focused here right now as an organization

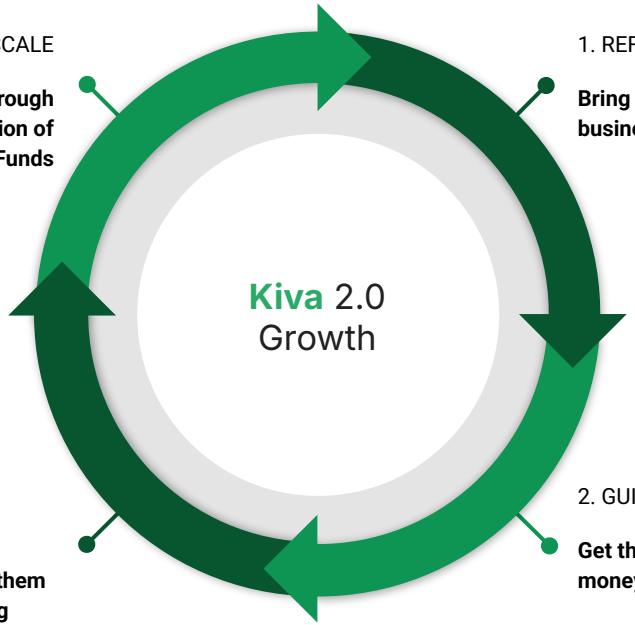
This will come later if we get enough signal

4. SCALE

Grow Enterprise through self-service expansion of Giving Funds

1. REFRAME - ATTRACT

Bring in new cause-minded businesses and HNWI



3. AMPLIFY

Unlock bigger giving & collective action from them by reducing fundraising friction and providing amazing impact reporting through Giving Funds

2. GUIDE - ENGAGE

Get them to deposit more money

We are building table stakes here

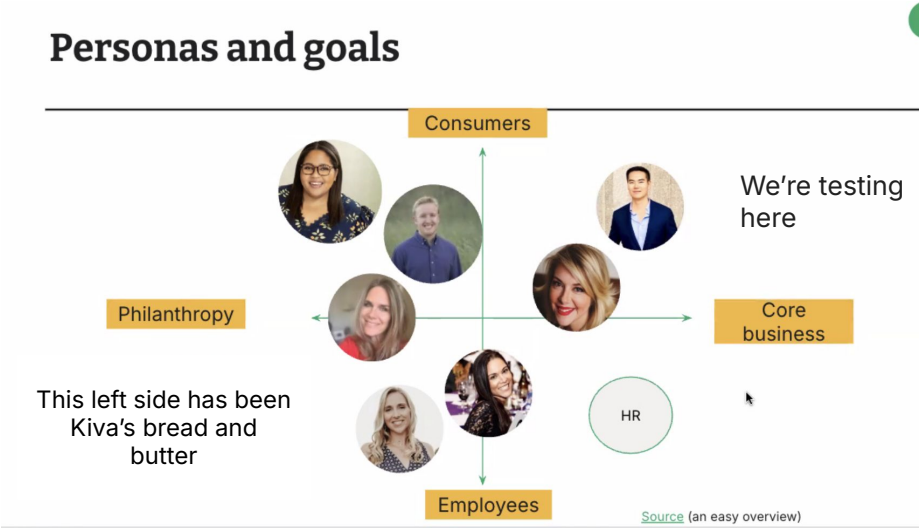
We will do this in the future and we will focus on targets that we can grow with rather than one and dones

Marketing is thinking about growth that can scale

- White glove growth is slower and incremental.
  - For every white glove partner it takes 3-5 relationship managers to onboard, setup and run the program so when you add more partners you have to add more staff to do relationship management.
  - We need to develop different types of outreach with partners that we can self-serve more without the legal and relationship management that large corporations need.
- White glove explanations explaining Kiva's value to each type of SME won't scale and doesn't work for every channel either.
  - Our marketing experience needs to move away from static landing pages into more immersive tools and content that delights
  - This way SMEs coming into the product have a better sense of the value they will unlock when they create a fund.

Why not focus the product on enterprise alone?

- In this political climate, CSRs are being defunded and enterprise pipelines are slowing. We are now trying to show value to markets, founders and owners who care about impact down market who don't face as much political blow back if they run impact campaigns.
- We don't know that adding self-service to the enterprise will help us grow. Enterprise customers don't churn due to lack of self-service and we don't win by talking about self-service.
- We believe enterprises will use giving funds but we are focusing first on unlocking new customers before focusing on existing. In the meantime we are gathering signaling on the exact use cases to solve for that they would be excited about.
- Our biggest problem to solve is about matching the right segment, with the right go to market that can scale, to the right specific giving fund product.
- By the end of the quarter we will close the gap and in the meantime will focus on table stakes and high certainty work that is true for all segments, or work that specifically let's us learn which segments we can have success with.
- We will do this step by step, acknowledging the effort it takes product and design to define each thing.



It’s not no, it’s just not right now.

If signal and bandwidth opens up we may even start defining some of these this quarter. It all just depends on what we learn.

Existing lenders & teams

- The B2C marketing and product teams are not ready to absorb it
- There is a lot of complexity with Teams

Migrate SME → Enterprise

- The product and SP teams are not ready to define this path yet as we focus on attracting SMEs in the first place
- Complex considerations relating to donor funds.

Existing enterprise

- If we pilot SMEs it could also help us learn about what would setup certain enterprise customers to self serve later
- There are enterprises who are interested in giving funds, but there is a ceiling to scale with that program. After we have figured a good business product in a box, that will help us inform how enterprise could adapt it. We actually are putting collateral in front of enterprise to learn more.

More choice

- Would add lots of complexity to the product that would slow down learnings
- Needs more signal about what level of choice is needed and for whom to minimize complexity.

The Amplify pillar requires a cross functional effort

Marketing hypothesizes

- Which target segment they believe we can feasibly acquire at scale?
- Which value proposition can we offer that matters to them and how can we message that to them?
- How can we build brand awareness in their environs?

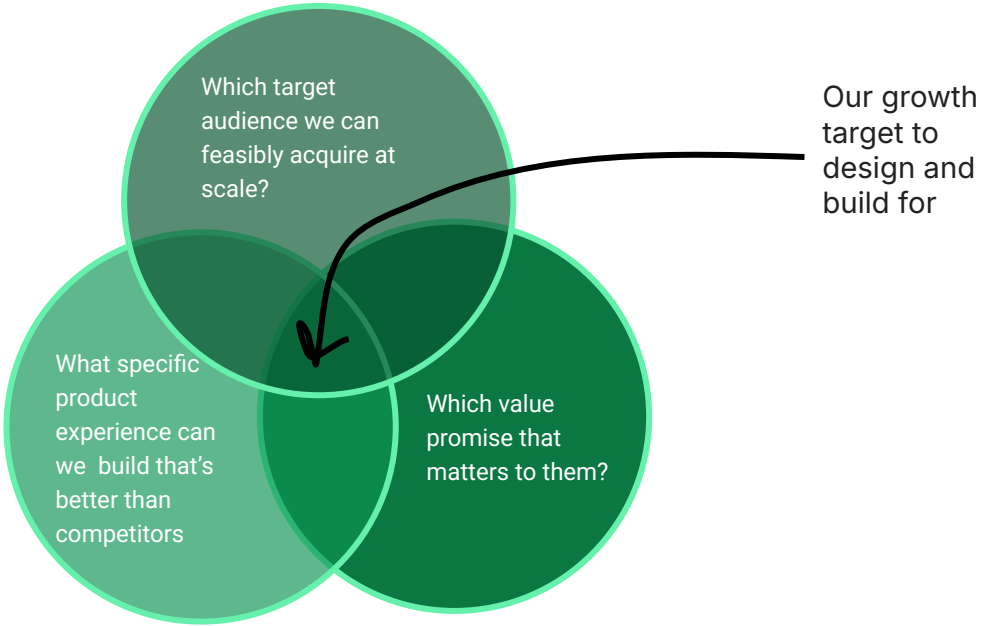
Marketing & Meg lead

- Qual and quantitative research into several targets to finalize a recommendation. This includes live tests
- Coming up with principals for serving the recommended audience

Shehaam and Erica decide

on the most impactful product strategy that:

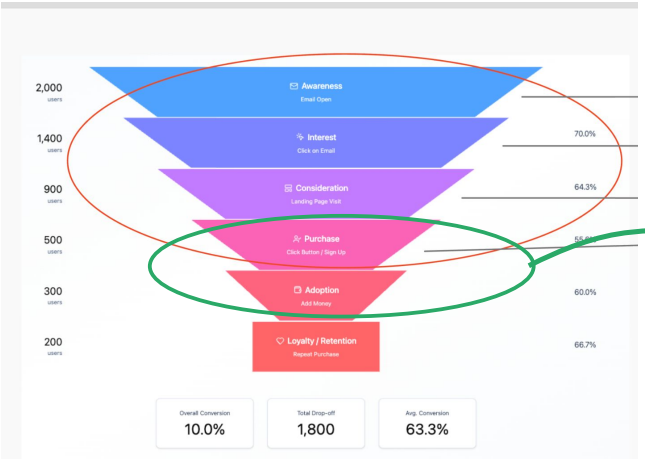
- delivers that value promise in the aha moment,
- and in their retention loops
- in a way that is better than their alternatives.
- In a viable way
- Taking inputs from the cross functional leadership pod and the B2B eng team

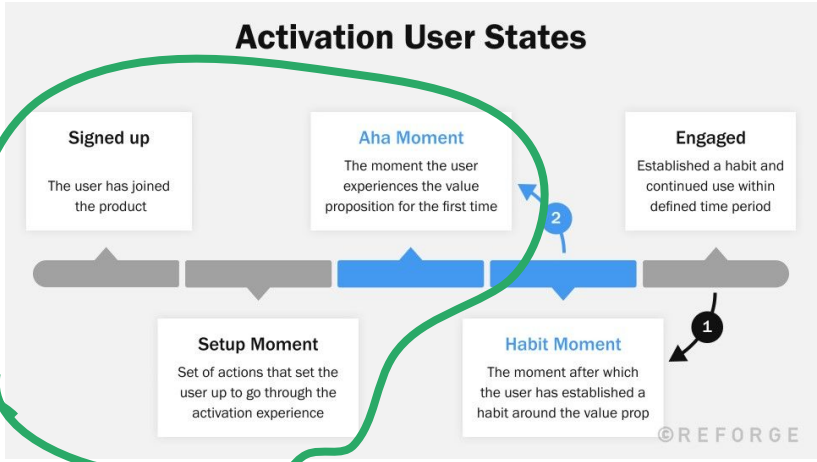


Marketing is focused on the top of the funnel and as they learn more about SMEs and HNWI.

The product we build will adapt as the target persona becomes crisper

We focus here first





Evolving Marketing Hypothesis 1 for SMEs:
We can drive interest and consideration with scrappy marketers who want easy cause marketing OR purpose driven leaders who want to make their money go further. They will be excited by seeing the impact reporting they can get and how they can use it for cause marketing and/or by calculators that shows how their money has a larger impact than traditional donations.
(this is still evolving)

Evolving Product Hypothesis 1 in the early activation states for SMEs:
We can activate these users if they can visualize success with their own impact page and nudge them to put in a small amount of money to see an impact page where they feel a connection to real people with real lives that they can use in storytelling, and a connected impact narrative that reaches across borders and sectors that feels rich and credible
(this is still evolving and differs by cold vs. warm leads)

How does Eng, Marketing and Product leadership stay in sync in this to prevent thrashing?

That is what the cross functional leadership pod is meant to solve, alongside shared goals you see in the OKR.

Tess, Shehaam, Asif, Erica, Maritza, Nathan and Jon work closely together

- so there are no surprises and
- so the engineering work we prioritize has cross functional support built-in so that it is set up for success.
- It also ensures end to end experiences are cohesive and trackable

We are trying to learn which SME/HNWI segments to go after and how to do so

- We don't yet know which segment within SME and HNWI will scale and how
- We don't yet have clear audience segment definitions
- We don't know which channels will work or which channels we can access
- We don't know the objections these audiences will have

Answering these questions progressively is the work for the quarter, driven by marketing and research.

What does that mean for Product/Design/Eng in the meantime?

Enable marketing to build pages and interactive tools to inspire and educate prospects so we can learn through live marketing tests (in progress with Shua and Tess as part of his AI work he kicked off last year)

Table stakes features, foundations, and features that have high confidence and activation features that can help us learn about who the right audience and right product is without over-investing, are what we build while we are uncertain.

1. Foundations
    a. Product typography (almost defined)
2. Table stakes features:
    a. Fundraising pages with a clear purpose, that look trustworthy (defined)
3. Features we have high confidence in
    a. Giving fund impact reporting (definition in progress)
4. How we learn about the right audience and the right product:
    a. How do we onboard the SME into understanding our value during onboarding them to make their first small donation to see their impact not started)
    b. Engineers will be pulled in to be part of providing input into how we solve for dropoffs to reach the 10% CVR (tbd what this will be)

kiva

SMEs (as individuals)

Who and why and how we GTM with SMEs?
When we use the term SME here we are still talking about individuals on Giving Funds.

© 2005 — 2025 Kiva All rights reserved.

Personas and goals

This is the easiest entry point into organizations - by creating materials that speak to this audience AND make it easy for them to speak about Kiva, we will be more successful

HR

Source (an easy overview)

Who	Jobs to be done	Kiva's unique selling point	Messaging
Corporate foundation Franny	Demonstrate how my programs are creating an impact to the organization and it's business priorities.	Reach borrowers across many impact verticals through ROI effective revolving fund, receive detailed reporting, and understand how funds are used.	Impact centric language; storytelling; outputs and outcomes; theory of change and how Kiva is helping achieve systemic change
Employee engagement Emma	Engage the majority of my employees in CSR-related activities that align with my business values.	Competitive engagement rates: Our partners achieve 40-90% engagement rates compared to industry average of 5-30%.	Engagement, connection, and inspiring employees through best practices and proven results.
Public relations Patrick	Tell a great story about social impact to build the brand's reputation.	Access to inspiring data and stories can be leveraged to improve brand reputation.	Easy to understand impact language that helps the brand build identity with Kiva's causes.
Ethical branding Brenda	Strengthen brand channels and build awareness through consistent messaging aligned with social impact.	Organizations can form deeper connections with audiences and build brand affinity through a shared social impact purpose.	Impact/cause focused messaging that can be disseminated easily across channels.

Who	Jobs to be done	Kiva's unique selling point	Messaging
Social impact marketing Mark	Engage an external audience in social impact-related activities that align with my business values.	Co-branded impact dashboard that can be leveraged in multiple channels and reward customers through incentives	Rather than focusing on features, language for this audience should speak to how these features achieve results.
Digital marketing Debbie	Improve the performance of a key initiative like email marketing, customer acquisition, or customer loyalty.	Co-branding and inspirational content that helps improve the performance of marketing channels (53% increase in ad CTR)	Assets should be inspiring and engaging enough for an external audience not familiar with Kiva focusing on easy to understand language and stories. .
Impactful Isabel	Create an easy to use/ out of the box social impact program that motivates employees and is aligned with business goals	Low cost access to impact dashboard, best practice resources, and revolving fund to run a social impact program. .	How easy, simple, and plug and play the program is to rollout and get internal stakeholders on board.

Brand focused personas

Public relations Patrick
Ethical branding Brenda

Unique selling point: Access to inspiring data and stories can be leveraged to improve brand reputation.

Problem/solution: Millennials and Gen Zs want to patronize and support companies that align with their values, and they reject products and services when they disagree with a company's business practices, values, or political leanings. Increasingly, millennials see businesses as focused solely on their own agendas rather than considering the consequences for society. 55% said business has a positive impact on society, down from 61% in 2018. (white paper)

Messaging speaks to: Easy to understand, inspiring, impact language that helps the brand build identity with Kiva's causes and inspires consumers to take action.

Validations: Data on brand positivity and awareness, press, market research, quotes from brand marketers

Paid ads

Learn about how Pure Leaf saw a brand positivity increase after running cobranded ads with Kiva

kiva

“In general, the new generation shopping wants to be more engaged with the brands they shop with. They want to be part of something. One of the ways Eileen Fisher can provide that is through partnering with Kiva.”

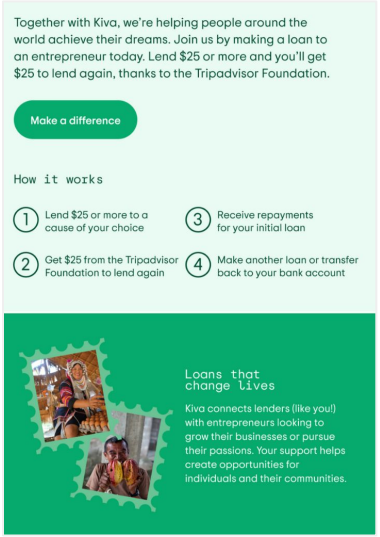
Tripadvisor

For the holiday giving season, Tripadvisor encouraged customers to lend on Kiva.org. Those who lent $25 of their own money on Kiva.org then received an additional $25 from TripAdvisor to lend again. The campaign was centered around the theme of travel and holiday traditions worldwide.

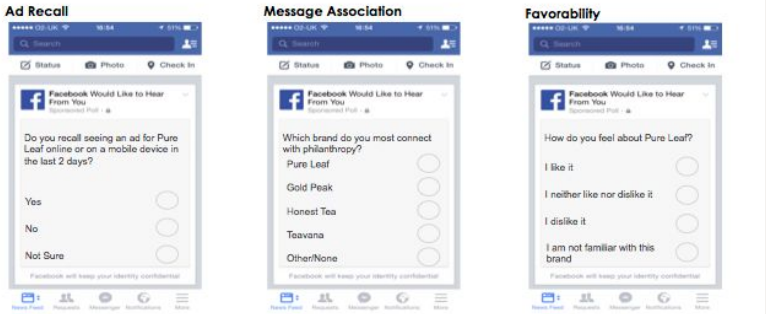
Metrics & Impact:

- 3,588 lenders redeemed a lending reward, with 794 first time depositors.
- This campaign impacted more than 4,000 borrowers, with lenders making $126,864 in loans.

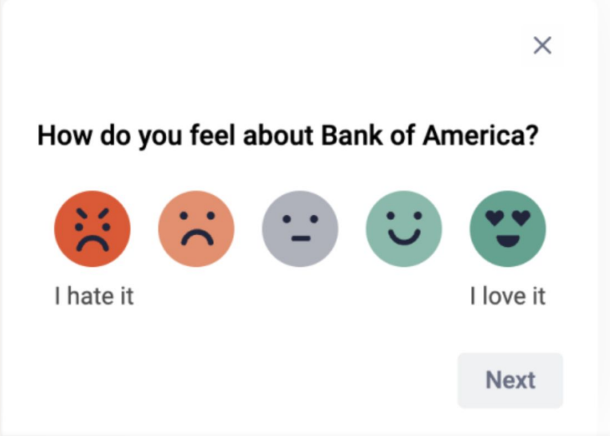


Two ways to measure brand favorability

Survey within paid ads



Implement a survey on Kiva's site



Integrated marketing campaigns help to align your brand with an impact area

Easy to manage

Let Kiva decide

Choose the amount to disburse and Kiva will direct it to the most impactful projects.

Set up a revolving loan fund

Lending funds directly or inviting your audience to receive a match are levers best used when running integrated marketing campaigns that build brand awareness and positivity

Customer loyalty focused personas

Digital marketing Debbie

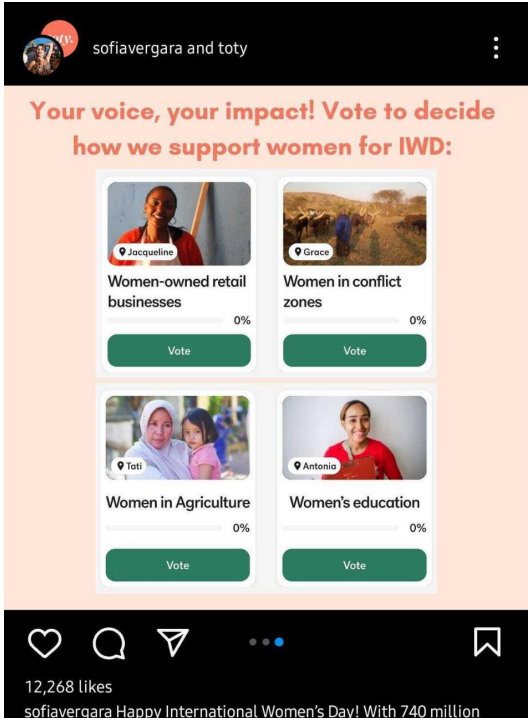
© 2005 — 2025 Kiva All rights reserved.

Unique selling point: Organizations can form deeper connections with audiences and build brand affinity through a shared social impact purpose.

Problem/solution: A Nielsen poll of 30,000 consumers in 60 countries found that 55% are willing to pay more for products and services provided by companies that are committed to positive social and environmental impact. 52% say they have purchased at least one product or service in the past six months from a socially responsible company. (white paper)

Messaging speaks to: Customer loyalty, lifetime value of a customer, brand affinity and sentiment, impact/cause focused messaging that can be disseminated easily across channels.

Validations: Data on LTV, quotes from customers, value of loyalty programs, market research, quotes from growth or retention marketers



kiva

“Our customers want the opportunity to take action and contribute to causes they care about. Our Kiva lending campaign made it easy and we saw high engagement as a result.”

—Matt Holton, PayPal

Customer loyalty *toty*

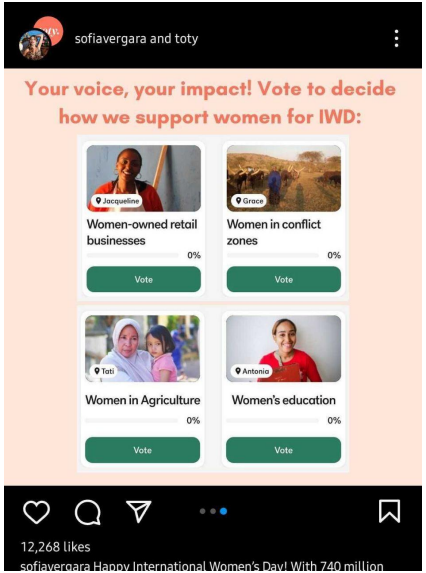
Who is *toty*:

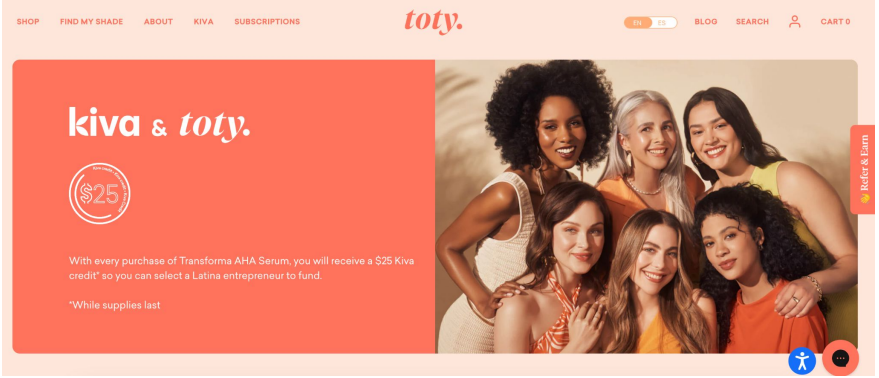
toty, Sofia Vergara's beauty brand, offers comprehensive products that protect, prevent & perfect signs of photoaging including SPF, skincare, makeup and wellness. The goal of our partnership is to mobilize measurable impact for women entrepreneurs globally, with particular emphasis in Latin America.

Partnership Overview:

- Kicked off Oct 2023 with launch of toty's Transforma AHA Serum
  - Customers receive Kiva credits with purchase
  - Supplemented with $30k continuous matching
- IWD'24
  - toty promoted their new Kiva impact page through social media, email, web placement, inviting customers to vote on matching funds
  - Drove 1700+ site visits
- Next steps:
  - Leverage Sofia's network to continue driving mutually beneficial brand awareness

Impact areas of interest: women





Marketing channels focused personas

Social Impact Marketing Mark

© 2005 — 2025 Kiva All rights reserved.

Unique selling point: Organizations can use incentives and inspiring storytelling to improve marketing channel performance.

Problem/solution: According to Mailchimp, the average open rate for all industries in 2023 was around 18%, down from 22% in 2018. Social media engagement rates have also seen a decline. A study by Rival IQ found that the median engagement rate across all industries on Instagram fell from 1.22% in 2020 to 0.98% in 2022.

Messaging speaks to: Improved marketing channel performance, Kiva's performance metrics, the growth of cause marketing, customers interest in impact and inspiring content, storytelling.

Validations: Improved marketing channel performance, quotes from customers, market research, quotes from integrated marketers

53%

Increase in Ad click through rate

kiva

“Our Kiva emails are converting users 20–25% higher than our regular onboarding nudge campaigns.”

– Harley Hoffman, Director at Hired

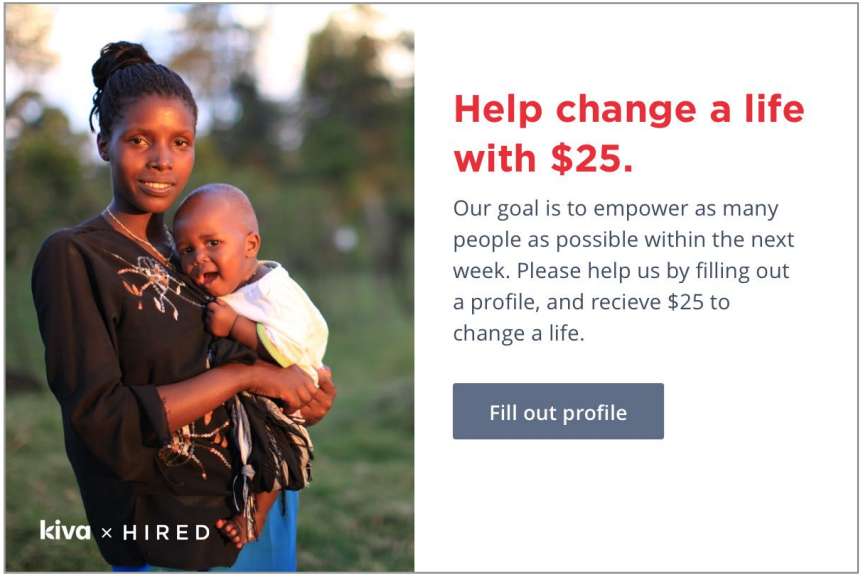
© 2005 — 2025 Kiva All rights reserved.

Hired successfully used Kiva credits to activate a specific audience into taking an action

Hired wanted to encourage users to complete their profiles on hired.com. They sent emails to users who had not yet completed their profiles on hired.com, offering a $25 Kiva Credit as an incentive to finish. When users completed their profile, they received an email with a unique, 16-digit code to lend on Kiva.org.

"Our Kiva emails are converting users 20–25% higher than our regular onboarding nudge campaigns."

– Harley Hoffman, Director at Hired

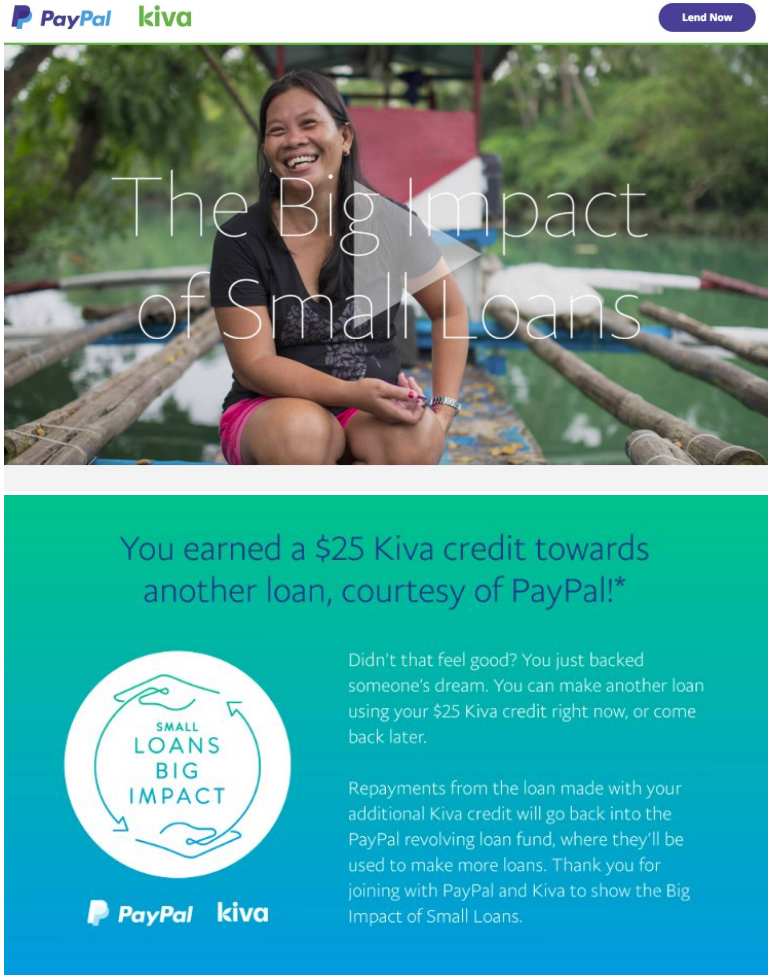


Paypal's integrated marketing campaign improved channel performance

For 3 years in a row, PayPal invited customers to lend on Kiva and matched the first 10,000 loans to a SME.

Metrics & Impact:

- 104MM emails sent; 9% Open Rate; 266,000 clicks. Emails received a 2% higher open rate then standard PayPal emails.
- PayPal aligned their brand effectively with supporting small businesses.
- $228,000 in Kiva Credits distributed, ultimately leading to $573,325 in total funds lent to help small businesses strengthen their communities, create more jobs, and drive economic growth



Gifting your audience with credits inspires brand loyalty

High engagement | Best for building brand equity

Put it to a vote

Let your audience vote for their favorite category or group to support.

Voting or offering lending credits are activations best used for a specific audience segment you want to engage, reward, or incentivize an action.

Unique selling point: Low cost and easy to use impact dashboard, best practice resources, and revolving fund to run a social impact program.

Problem/solution: Advocating for social impact programs within organizations can be challenging due to various internal and external factors. Challenges stakeholders of organizations that don't have a dedicated team or budget for social impact programs include: budget limitations, ROI uncertainty, and wanting to test out a low risk/low cost solution.

Messaging speaks to: Return on impact and financial sustainability of a Kiva program. The ease of use and access of Kiva's tools. Ability to pilot and then expand within the organization by proving success through results.

Validations: Case studies that have used Kiva for multiple use cases over several years, the ROI efficiency of the revolving loan fund, basic success points like engagement rates and increased impact.

kiva

“Engagement isn’t for just large companies. Small-to-midsize companies now feel increased expectations to be more strategic in their philanthropy and empower their employees to give time, talent and money.”

© 2005 — 2025 Kiva All rights reserved.

Market Research: SMEs

SME Giving Landscape & Motivations

SME Giving Landscape

- SMEs account for **~99%** of businesses in the U.S., representing a large cumulative charitable potential
- **~60%** of SMEs donate or support charitable causes in some form annually
- Average annual SME donation ranges from **$1,000–$10,000**, depending on size and revenue

Micro SMEs	$1K-$3K
Small SMEs	$3K-$7K
Mid-sized SMEs	$7K-$10K+

Top motivations: community impact, brand reputation, employee engagement

Why SMEs Give

Community Impact
SMEs often donate to local causes that reflect their customer base or employees' priorities

Brand & Marketing Benefits
Donations improve reputation and build goodwill with customers

Employee Engagement
Giving programs increase morale, retention, and team cohesion

Next-Gen Leadership & Culture
Younger SME leaders prioritize values-aligned giving and social responsibility

© 2005 — 2025 Kiva All rights reserved.

Market Research: SMEs

Challenges & Opportunities

Challenges to SME Giving

- **Limited budgets** and cash flow constraints prevent larger or recurring donations
- **Lack of awareness** or education on charitable options, including DAFs, workplace giving, and co-giving models
- **Administrative burden:** manual tracking, tax reporting, or compliance concerns
- **Difficulty measuring impact** or aligning with cause-specific outcomes

Budget → Awareness → Admin → Impact

Emerging Trends & Opportunities

- **Peer/Collective giving:** SMEs increasingly participate in pooled funds or local giving networks
- **Digital platforms:** Online platforms and micro-giving tools simplify contributions and impact tracking
- **Cause alignment:** Climate, education, and social equity are top causes for SME engagement
- **Workplace giving:** Employee-led programs and matching donations are growing
- **Storytelling & visibility:** SMEs seek recognition for impact, e.g., social media amplification or event sponsorship

Strategic Implications

- Build **SME-friendly giving programs** that reduce administrative burden
- Offer **curated cause alignment** & local giving opportunities
- Activate **digital and collective giving platforms** to simplify participation
- Highlight **stories of impact** to reinforce brand value and motivate repeat participation

© 2005 — 2025 Kiva All rights reserved.

Our hypothesized marketing target as of 1/24

Medium, growth-oriented (20–200 employees)

Medium, growth-oriented businesses

- 10-500 employees
- Recurring profit → *Angel through Series B are NOT a target*
- C-suite approval likely required for impact spend

Small businesses (<10 employees)

Small businesses

- 5-50 employees, most are hourly
- May have a single physical location
- Expect annual contributions closer to $1k from the business
- Owner-decision maker can act quickly without needing buy-in

Best results when purpose driven (eg. B-corp)

Marketing Targets:

- Womens retail / online brands
- SP leads
- Climate tech startups (early-stage, value-aligned)
- Impact themed aligned B Corps
- Lenders with biz email

Marketing Targets:

- Email women-led wellness studios (yoga, pilates, fitness)
- Email sustainable home goods brands
- Former US borrowers
- Lenders with biz email

Our marketing bets on: Who, for what value promise, and how to deliver confidence that that we can meet it before we over-build

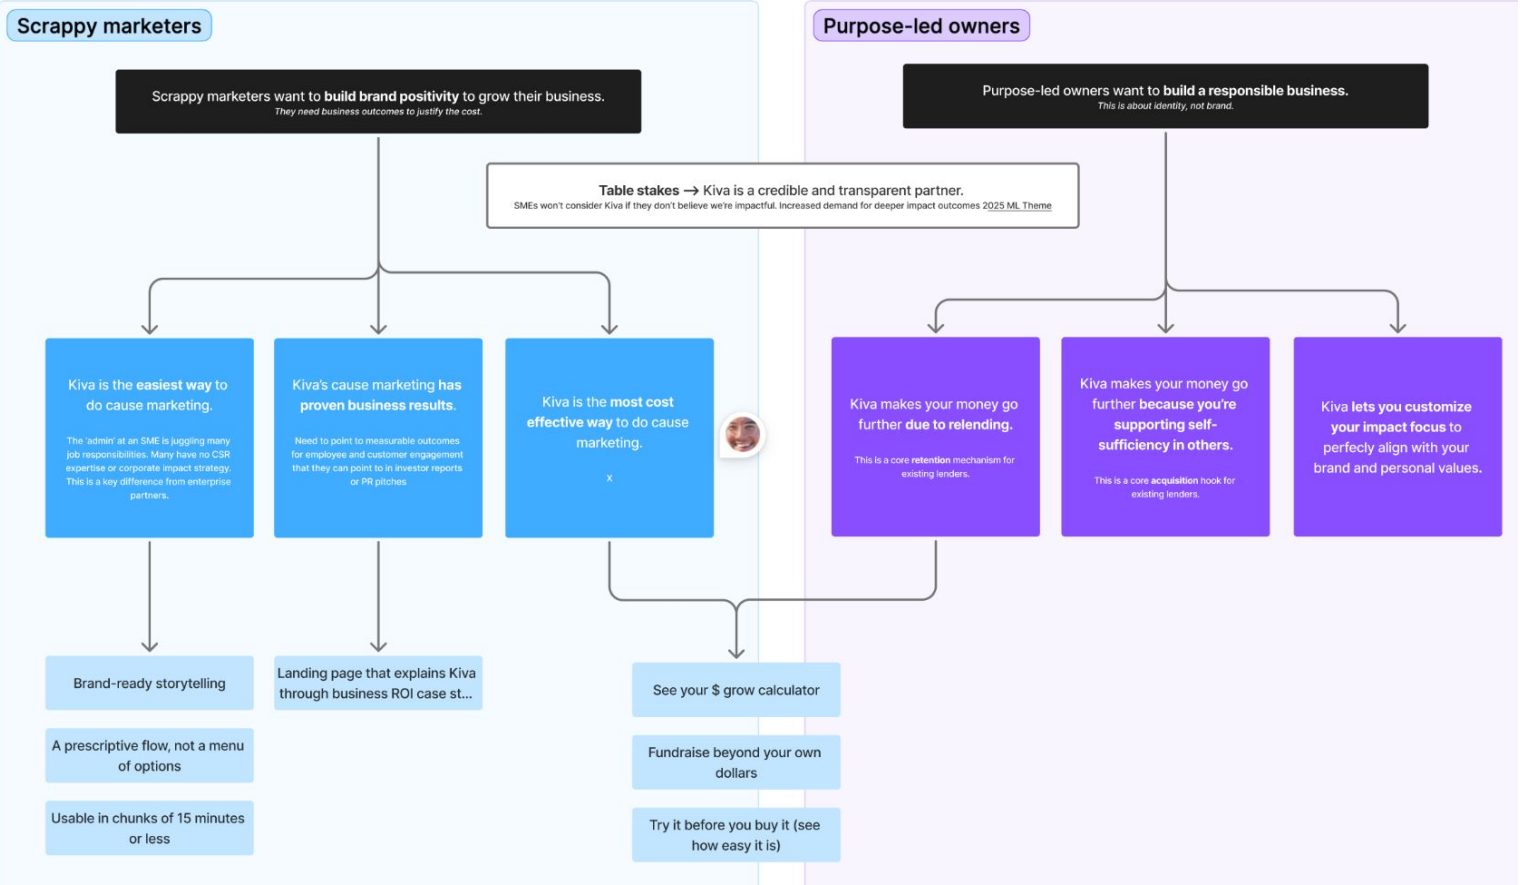
Job-based segment
What are they trying to accomplish?

✅ *Locked in for the quarter*

Value promise
Why does this job-based segment choose our product?

👉 *Top priority to learn: what is the **most** important promise to lead with for each job-based segment?*

Value delivery
What might we build to fulfill this value promise?



Where we can do better than competitors

Pain Point	What It Looks Like in Practice
CSR is ad hoc	One-off donations, no continuity
Impact is unclear	"We donated, but... did it matter?"
Limited internal capacity	No CSR lead, no time
Storytelling is hard	Nothing concrete to share externally

We signals that SMEs are often willing, but stuck. We can smooth this part and make it delightful so they feel a sense of confidence when they use our product. We make them look good and we make it feel easy.

kiva

HNWI

Who and why and how we GTM with HNWIs?

© 2005 — 2025 Kiva All rights reserved.

Market insights: DAFs & Financial Advisors

Market Size & Growth

$326.45B
Total DAF Assets (FY24)
Nearly doubled since 2020

$64.89B
Grants Recommended (FY24)
+19% YoY

3.56M
Accounts across 1,485 sponsors

25.3%
Payout Rate FY24

Donor Behavior & Trends

- Many treat DAFs as **mini-foundations** → delay grantmaking
- **Education gap:** $250B+ idle due to lack of donor understanding
- **Micro-DAFs** and workplace giving expanding donor base

Donor → DAF (**$250B+ Idle**) → Nonprofit

Advisor Engagement & Next-Gen Donors

- **72%** of wealth advisors do not discuss philanthropy
- Only **6%** of HNWIs have charitable conversations with advisors
- Next-gen: **81%** plan to switch advisors; value alignment & peer giving are critical
- **Emerging interest:** collective giving, global impact, tech-enabled philanthropy

- Build ongoing **DAF donor education** programs
- Engage **high-payout DAF accounts** strategically
- Activate **financial advisors** as philanthropic touchpoints
- Leverage **tech and giving collectives** for next-gen donors

HNWI segments

Job-based segment
What are they trying to accomplish?

Value promise
Why does this job-based segment choose our product?

Market segment
Who can we sell to?

Wealthy individuals **who already love Kiva** want a tax-advantaged way to lend.

Value promise
Giving funds let me unlock additional charitable wallet to spend on Kiva.

Market segment
Existing Kiva supporters

- Past users of DAF Pay
- Other wealthy users

Financial advisors want to impress and satisfy clients to maintain their business.

Value promise
Kiva is the most transparent way to help my clients make an impact.

Market segment
Advisory roles

- Financial advisors
- Wealth managers

Investment-minded individuals want to maximize the impact of their donations.

Value promise
Kiva makes my money go further...

A. Due to relending
B. Because it supports livelihoods and redistributes wealth

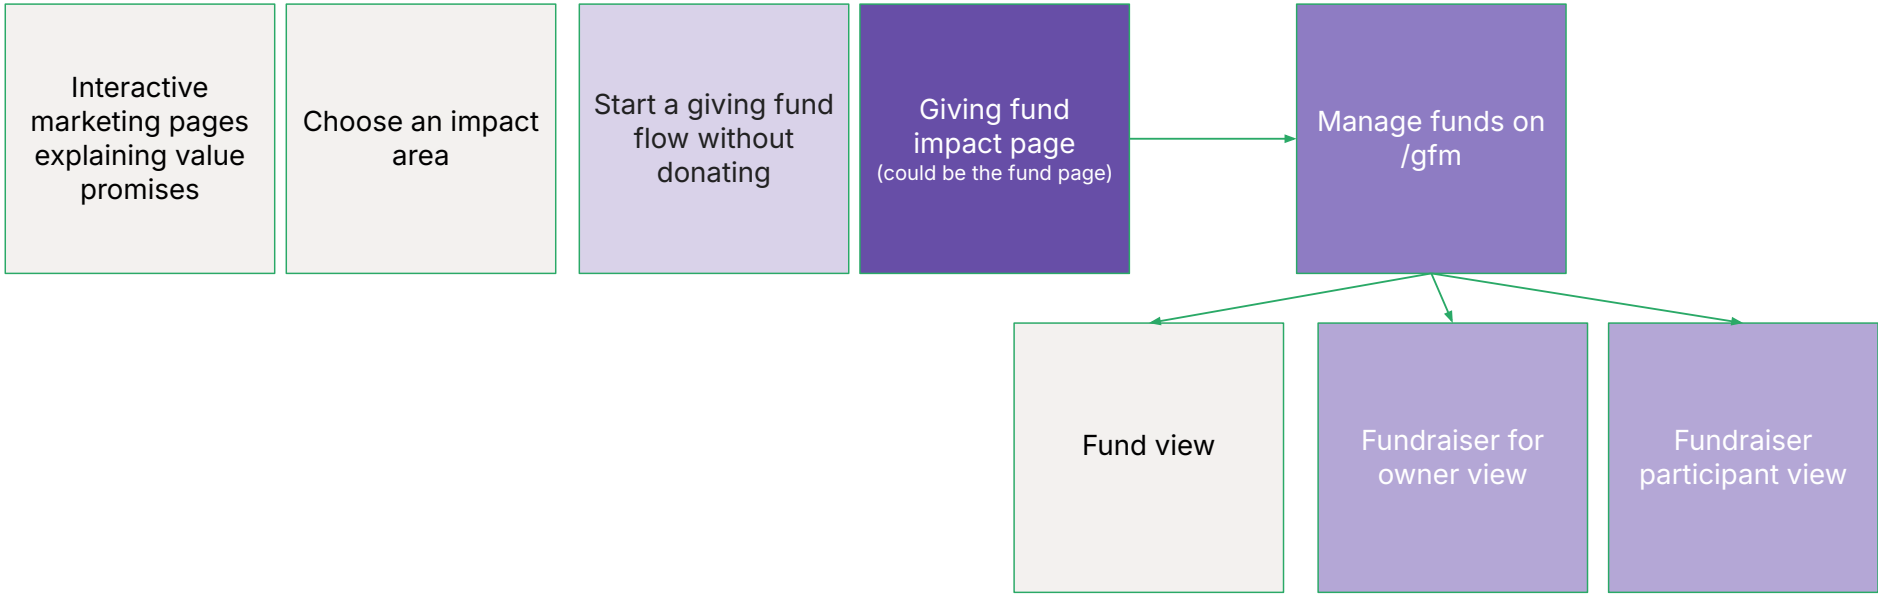
Market segment
DAF holders unfamiliar with Kiva

- Gen Xers who use DAFs for family planning
- Managed family accounts
- HNWI

The roadmap

© 2005 — 2025 Kiva All rights reserved.

What pages do we think the B2B eng team is most likely to touch this quarter - the purple boxes, the darker the more the experience will change (as of 1/29)



Aligned work as on 1/29. Sequence TBD

Candidates	Description	Status	Status Note
FOUNDATIONS Typography	As a Product leader I want page purposes and above the fold experiences to be sharp and more compact typography is foundational to that. I want to start small with one GF page having visible changes	Blocked	Pending Lin and Nathan kickoff with Stover
CONSIDERATION “Try Before You Buy” (Pre-product)	As a HNWI or SME that isn’t being hand-held by SP I want to understand the value I can get from impact reporting before I create an account to create a fund.	Definition	Pending idea brief being kicked off with Eng. May not need Giving fund eng work as the marketing pages sits with Shua, but we want to talk through the problem and solicit ideas
CONSIDERATION Impact page empty state and perhaps more	As a HNWI/SME I want to be nudged along to understand how I can leverage impact reporting for my business so I see what success might look like before I donate	Definition	Pending idea brief being kicked off with Eng
AHA MOMENT First small donation	As a HNWI/SME I fully understand the power of Kiva’s impact reporting when I put a small donation in and see the real people I have helped. I am now ready to spend more time on the platform and if I am looking to give more.	Definition	Pending LOE understanding to decide on scope. Will also retroactively do an idea brief kickoff
CONSIDERATION & TRUST Fundraising Page Refinement	As a HNWI/SME who is trying evergreen or goal based fundraising, I want to feel confident that the page I am sharing looks trustworthy and focused on me/my brand. To achieve that, as a participant of their fundraiser I need to understand that the page is a fundraiser so I don’t get distracted and confused about what the product is while test driving	**Ready for dev**	Pending decisions on fund page
RETENTION & DONOR ACQUISITION V2 Participant Data Sharing (Add Activity Feed)	As a HNWI/SME I want to feel excited by seeing clients or contacts I know are donating and personally thank them. I also want other participants to feel trust because they can see others are donating too.	**Ready for dev**	Somewhat dependent on the fund pade redesign

On the back burner as of 1/29,

On the backburner for various reasons:

- Some because we need to wait to get more signal from a segment we can grow with
- Product needs more time to reason
- We need more product, Marketing, SP and design capacity to free up
- We need to focus first on acquisition value promises and GTM

Backburner work:

1. Giving funds for enterprises
2. Self service tools - adding users, managing users, private reporting
3. Self service for enterprise
4. Salesforce integration for SME → Enterprise
5. More granular choice of impact area
6. Giving Funds for teams
7. Recurring donations
8. DAF donate to create a fund

Thanks!

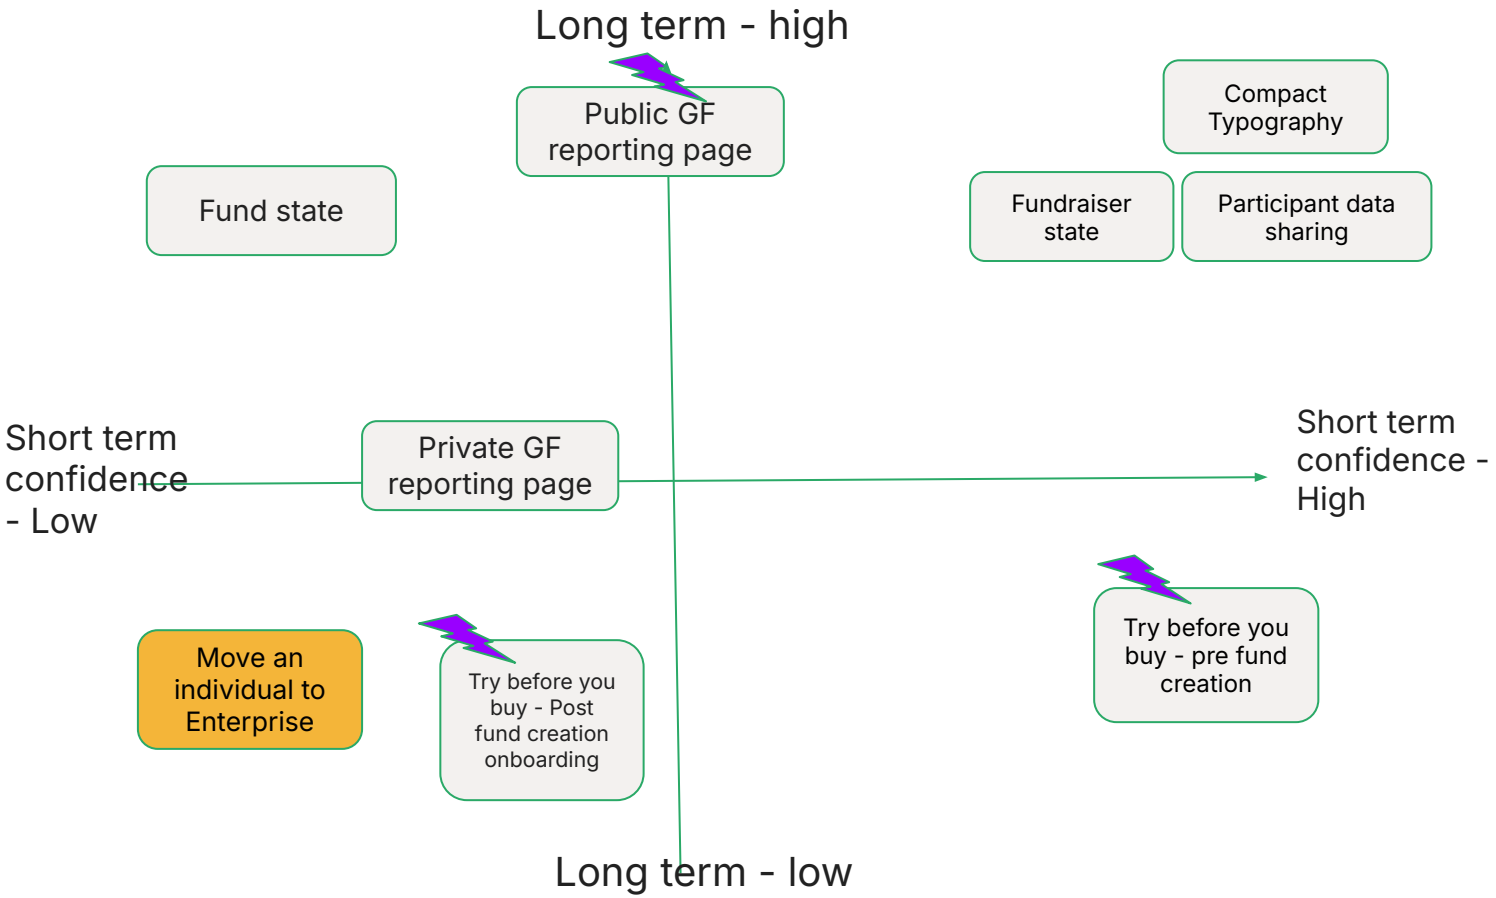
© 2005 — 2025 Kiva All rights reserved.

Our readiness to build varies..

Level of confidence that we have enough evidence to know what to build with enough specificity as of 1/24.

Yellow means Product and SP bandwidth not high enough to define this quarter due to higher priorities

Thunder means high value unlock for learning as of today



Dependencies and blockages.

Blocked

Business flag and name for personalizing the experience

Ready for eng work or planning

Compact Typography

Fundraiser state

Participant data sharing

Should brainstorm but not yet dependent on GF Eng team

Try before you buy - pre fund creation

Ready?

Automated tests that will make building on top of giving funds easier,.
